ASUS ROG Thor 1000W Platinum II EVA Edition unidad de fuente de alimentación 20+4 pin ATX ATX Negro, Rojo, Plata:

### ROG x EVANGELION - The Ultimate EVA Equipment. Diseado por ROG

Es 2022. Republic of Gamers está lanzando nuevos equipos para el proyecto EVANGELION. La edición EVA platino de ROG Thor II usa una piel inspirada en EVA y cuenta con componentes y actualizaciones de enfriamiento que permiten los niveles de ruido más bajos, incluso durante las escaramuzas más exigentes con la oposición.

### Diseño Axial-tech

Un ventilador Axial-tech de 135mm con control PWM produce menos ruido y mantiene las temperaturas bajo control.

### Disipadores ROG

Los disipadores de calor ROG tienen 2 veces más volumen que los diseños tradicionales, lo que facilita temperaturas más bajas, una vida útil más larga de los componentes y una operación extendida de 0dB.
