Candado fino de combinación para portátiles

[Kensington K60601WW-SP cable antirrobo Negro:](#)

En los finos portátiles de hoy en día es posible utilizar candados de cable típicos, pero, son tan finos que, cuando tienen un candado fijado, no pueden permanecer en posición horizontal porque el grosor del candado es superior al de los portátiles, lo que provoca que queden desequilibrados respecto a la superficie. El candado fino de combinación para portátiles es la solución de bloqueo sin llave más resistente que permite que los portátiles ultrafinos y 2 en 1 con ranuras estándar para candados permanezcan en una posición estable y horizontal.
