Enable dual-4K displays, high-speed device connectivity, power, and networking from a single USB-C dock for consistent productivity anywhere.

Drive two 4K 60Hz DisplayPort displays on Windows, Linux, and ChromeOS to increase screen real estate. Ideal for hot desks and remote users who need instant multi-monitor setups.

Connect modern and legacy high-speed devices with 3x USB-C and 2x USB-A (5Gbps), while a dedicated USB-A 2.0 port handles keyboard and mouse dongles or other essential peripherals. Reduce hub sprawl and keep critical ports available for storage, capture, or field tools.

Provide 100W PD charging passthrough and Gigabit Ethernet for stable, wired performance at home, in the office, or while travelling. Standardize deployments with the same display, USB, and network experience to simplify rollouts and support.

This hub features a housing made from 85% post-consumer recycled (PCR) plastic. The product also ships in FSC Mix packaging made from responsibly sourced materials. These materials help align your IT infrastructure with your organization's sustainability goals, without compromising on quality or durability.

Observaciones / Requisitos

Requerimientos del Sistema y Cables	A host device with an available USB-C port (to ensure full adapter functionality, the host device's USB-C port must support USB Power Delivery and DP alt mode). Optional: USB-C power adapter (for example, your laptop's USB-C based power adapter).
Nota	Not all USB-C ports support the full functionality of the USB Type-C standard. Ensure that your host USB-C port supports USB Power Delivery and DP alt mode. If the USB-C Host does not support USB Power Delivery, the PD Power Port will not supply power to the USB-C Host. A 4K-capable display is required to achieve UHD resolution (4K is also known as 4K x 2K). USB 3.2 Gen 1 (5Gbps) is also known as USB 3.1 Gen 1 (5Gbps) and USB 3.0 (5Gbps). Your laptop might have specific charging requirements. For example, if your laptop requires exactly 60W of power and an adapter consumes some of the 60W, your laptop might not recognize that it is getting enough power. For more information about Power Delivery, refer to the manufacturer of your hardware.
